

IN THE SUBSTITUTE SPECIFICATION

Please cancel paragraph 003 of the Substitute Specification. Please replace that cancelled paragraph with replacement paragraph 003, as follows.

[003] A web guide element, configured as a turning bar, is known from DE 93 20 281 U1, and which can be brought into at least two angled ~~positions~~position in relation to an incoming web. In the course of pivoting the turning bar from a first position into the other position, openings of an inner body are displaced ~~with respect~~with respect to openings in an outer body of the turning bar, in such a way that the air outlet openings which are not needed are closed.
